

Hike the 'Ologies

G26110102

with Connie B. Burkhart

November 1-7, 2026

Welcome to Hike the 'Ologies!

Explore the geology, paleontology, archaeology, anthropology, and history of Ghost Ranch and the surrounding area through easy-to-moderate hikes to places that tell the stories of the rocks, the people, and the fossilized life of the past. Learn how these 'ologies' fit together, bringing history to life as we set the stage with lectures and adventures out in the field, visiting sites and important geologic areas. Participants must be able to hike at 6,500ft in elevation on uneven terrain, carrying a light pack for water and a sack lunch, as several of our hikes will take us out in the wilderness until early afternoon. This earth science-based hiking excursion is a signature program developed and led by Connie B. Burkhart, who weaves together the narrative of the past, taking us back to the period when the first dinosaurs roamed the land that is now Ghost Ranch. Come join this immersion into the 'Ologies' and hike the stories of the land and legends of the ones whose footprints echo through time.

HOST GHOST RANCH
