

## Fire it Up! Art Welding

G26070305

with Connie B. Burkhart & David Kadlec

July 19–25, 2026

Get ready! Get set! Get fired up for your fun-filled class of creativity, sparks, and the enticing smell of burning metal.

WHAT WE PROVIDE & WHAT YOU NEED TO BRING ~ We have all the tools you need and we delight in helping you safely and efficiently cut, form, and work metal. For your supply needs the only item we ask you to bring is a pair of your own snug-fitting leather 'deerskin weight' wrist-length work gloves. This is important and helps with dexterity in most areas of your work. We do provide large, heavy welding gloves for your bigger spark-throwing activities as well as your eye and ear protectors, aprons, Oxy/acetylene and MIG and stick welders, plasma cutters, power grinders, scrap metals, tools, and personal work stations.

Some folks like to bring their own metal treasures to incorporate in a project or share with the class, but it is not a necessity. We ALWAYS accept metal donations to our 'treasure pile' if you bring some scrap and want to leave something behind for the next 'welding bug bitten' victim that's great. Also, remember that you will take home what you design and build, so it has to fit

in the overhead bin, under the seat, in the bed of the truck, or on top of your vehicle. Create responsibly.

WHAT TO WEAR ~ Dress in layers using a cotton long-sleeved cotton shirt to put over your T-shirt when needed, and always wear long pants and closed-toed leather shoes. Bring clothes you won't mind getting dirty or burning small holes in. Also helpful is a bandana to protect your hair and hold your goggles on your head.

CLASSROOM LOCATION ~ Our welding studio is in the Metal Arts Barn located behind the old barn on the campground side of the ranch.

SCHEDULE ~ On your day of arrival we will gather in the Dining Hall at 6:45pm for general ranch orientation and then meet with our class for a brief discussion. We work from 9am to 5pm Monday - Thursday with a break from noon to 1:30pm for rest and lunch. Friday we have a shorter time to work and an evening art show.

Take Care, and please feel free to contact be in touch with any additional information you may need regarding Fire it Up! Art Welding.
