

## Architectural Illustrations & Home Portraits

**G26070405**

With Rick Bartholomew

July 26 - August 1, 2026

### Welcome to Architectural Illustrations & Home Portraits!

Enhance your artistic 2D and 3D perspective talents using various types of architectural and interior illustration techniques including “realistic” and “abstract” visualizations. Participants will enjoy taking in the visual solace and vistas of the property and terrain, its surrounding built and vista environments through sketching and photo recording to use as inspiration for a finished illustration(s) of southwest architecture, its interiors and construction detailing.

A day of sponsored van field trips to Georgia O’Keefe’s home studio in Abiquiu, the Muslim Worship Complex, the Greater World Earthship Community, and the Taos Art Museum (Fechin House) will be an educational and visual resource for the artist. As the workshop instructor, I will share with the class my architectural and interior design illustration skills in sketching, color mixing, “shade and shadow” techniques that easily translate into realistic and fun abstract color creations. I will also share my professional career as an illustration artist and the opportunities available to future

# HOST GHOST RANCH

aspiring illustration artists that may be interested in creating home portraits, individual clients, and/or the building industry.

In addition to our natural outside environment, we will compose our art pieces in an interior studio environment. What I so enjoy is the comradery of artists working together and learning from each other and what an opportunity for such an experience as Ghost Ranch! Come join us!
